

WE have found that our uninterrupted dinners, evening hours, mornings, and most particularly Sundays, are more pleasant without the constant intrusions of the solicitors. I am most grateful that we no longer have the "cold callers" from the stock market people. This Law, for us, is one of the best quality of life actions by the State government that we have experienced in many years. WE would be EXTREMELY concerned if the Federal government tried to overturn this, and we will most definitely watch to see which of our elected representatives from New Jersey votes in favor of the Federal overturn, if that comes to pass.
